EVORA GT410

The next evolution of Evora is here. The stunning new GT410 Sport takes the Evora's unique attributes to spectacular new heights. Small car agility, precision and response meets big car refinement and comfort like never before. Masterfully sculpted composite body panels from the flagship GT430 bring major advances in aerodynamic efficiency. Generating over three times the Evora 400's maximum downforce without any increase in drag, the GT410 Sport is now the most aerodynamically efficient Lotus of all. As a pure driver's car it remains unchallenged in its class, setting new standards for poise, precision, communication and driver engagement at all speeds. To keep it one step ahead, the unladen weight now stands at just 1,320 kg, with lightweight options available to bring it all the way down to 1,256 kg dry. Available in both 2 seater or 2+2 configurations, with either manual or paddleshift automatic transmissions, the Evora GT410's performance can be enjoyed without compromise.
